

February 19, 2024

Dear Valued Customer:

Our commitment to environmental sustainability supports our Mission to enable our customers to make the world healthier, cleaner and safer. Our climate strategy includes greenhouse gas (GHG) emissions reduction targets that align with the Paris Agreement and have been validated by the Science Based Targets initiative (SBTi).

Thank you for your inquiry to better understand the climate impact of the goods and services you purchase. We recognize the need for improvements in data accuracy for calculating scope 3 emissions, particularly to transition away from spend-based methodologies.

Thermo Fisher can generate a report with the GHG emissions associated with the goods and services you've purchased (covering all Thermo Fisher subsidiaries including Fisher Scientific). The report is aligned with the GHG Protocol and may be used in your scope 3 category 1 inventory.

To request your report, please contact [customer.sustainability@thermofisher.com](mailto:customer.sustainability@thermofisher.com).

Sincerely,  
Matthew Yamatin  
Sustainability Program Director
